

The Power of **ONE** Capabilities

Throughout the entire lifecycle of any solution, SIGNET has the services and capabilities to handle projects of any size or complexity.

Product Selection

As the leading integration company in New England, SIGNET represents more than 300 manufacturers, translating into a wide variety of products developed to meet the specific needs of each client.

Pre-Planning, Consulting, and Engineering

With the highest levels of training and industry certification, SIGNET engineers work directly with developers, architects, and consultants from the earliest stages of a project through completion.

Technology Lab

SIGNET customers have the peace of mind in knowing that their systems are delivered fully tested and validated; we pride ourselves on meeting 100% of performance requirements without compromise.

Installation

Upon delivery, a SIGNET project team—comprised of skilled project managers, project engineers, electricians and technicians—ensures all installation schedules are met.

Client Training

Our SIGNET Customer Service Trainers meet with clients well in advance of systems installation to understand their needs and expectations. Upon installation, SIGNET provides customized on-site training to ensure optimum systems performance.

Service and Support

In addition to a one-year guarantee on all systems, SIGNET assigns a customer service team to each client, providing support for the life of the system. Around-the-clock Critical and Emergency Response, Remote Diagnostics, Technical Support, and Critical Component Stocking in addition to complete testing, maintenance and code compliance underscore our pledge to maximum customer service and support.

Facilities and Resources

With offices strategically located in Massachusetts, Maine, and Rhode Island, and more than 65 service vehicles on the road, SIGNET has both local and regional resources to resolve issues swiftly, efficiently, and accurately.

The Power of **SIGNET** Market Expertise

With an eye firmly focused on clients' needs, SIGNET designs innovative and proven solutions for a broad base of public and private entities.

- Corporate** Owners and managers of office buildings across New England turn to SIGNET for the technology solutions that define our commitment to excellence—from new construction to retrofitting an existing building, we are ready to respond and deliver.
- Institutional** Police stations, correctional facilities, public safety, and transportation venues rely on SIGNET to provide the most technologically advanced life safety, communication, and security systems available.
- Education** SIGNET recognizes the unique security, budgetary, and infrastructure challenges facing educational facilities today; as such we develop cost-efficient solutions to create the safe environment necessary to maintain the focus on learning.
- Healthcare** As the largest provider of nurse call systems in New England, serving more than 120 hospitals, SIGNET is at the forefront in the design and delivery of solutions to reduce noise pollution, increase patient and staff satisfaction, improve work flow and design communication systems that are cost-effective and state-of-the-art.
- Government** Preparation for and response to an emergency requires the proper equipment and resources; without it lives can be at peril. SIGNET allows federal, state, and municipal institutions the capability to respond and protect through use of our proprietary life safety, security and communications technologies.
- Judicial** State and federal courthouses require the most technologically advanced safety systems to monitor and protect the public. SIGNET meets the needs of today's heightened security requirements with its proven protection solutions.
- Plus...** Additionally, SIGNET is well versed in the needs of housing, non-profit, and worship facilities, and has extensive experience in military, retail, utility, and residential environments.
