

### **Mission Statement**

---

SIGNET's mission is to provide our clients with innovative solutions and superior service that enhance life safety, security and communications.

### **Core Values**

---

We highly value the four pillars of our success: our clients, our employees, our partners and our community.

#### **Clients**

We share an unwavering vision of a common goal: to ensure the satisfaction and success of our clients.

#### **Partners**

We value our partners; this value is demonstrated by our loyalty and by our commitment to conducting business in an honorable and reputable manner.

#### **Employees**

As our most valuable asset, SIGNET actively invests in the training and advancement opportunities of all employees. We recognize that their integrity, work ethic and performance are paramount to SIGNET's success.

#### **Community**

SIGNET recognizes that it has a sense of corporate responsibility to the community by donating time and money to worthy charities and by providing a stable source of employment.

# The Power of ONE

**Put the POWER OF ONE  
to work for you.**

Choose SIGNET for all your mission critical technology systems. We are the largest privately held systems integrator in New England. The Power of One is not just our motto, it defines SIGNET as the demonstrated leader in the design, installation and support of your voice, data and video communications systems. Our solutions are flexible, scalable and are delivered on time and within budget for your mission-critical building system technologies.

## Service

SIGNET provides 24/7/365 emergency response for all of your critical systems. Periodic testing, maintenance, support and deficiency tracking, many required by local, state and federal codes, can help protect people and property while keeping you in compliance. We can customize a preventive maintenance program tailored to meet your budget while ensuring maximum uptime and return on investment of your critical communication systems.

## Life Safety

SIGNET has been delivering fire detection and fire prevention systems to public and private facilities for over 35 years. Our NICET-certified staff design, install and service code-compliant solutions to meet your specific needs, whether it be in health care, education, corporate, institutional, government or judicial facilities.

## Integrated Security

SIGNET is recognized as a leader in delivering the integrated solutions required to meet today's quickly evolving security marketplace. Our ability and experience in integrating multiple systems into one unified platform can enhance your system functionality and ease of operation.

## Communications

SIGNET understands that a stable, dependable communications infrastructure is critical in today's business world and that the system you choose should improve the way you communicate with your clients, employees, suppliers, vendors and satellite offices. From telephone systems, public address and voice evacuation, our factory trained staff can ensure your business critical systems are fully functional and scalable.

## Healthcare Communications

SIGNET is the largest provider of nurse call systems in New England. We design integrated communication solutions that effectively impact staff productivity and therefore, have a positive impact on level of patient care and response. Our fast and flexible patient-to-staff and staff-to-staff communication revolutionizes the way patients and staff interact.

## Audio Visual

SIGNET provides technology systems for your AV and collaboration needs. From system integration to video conferencing, distance learning, classroom technology and digital signage, our expert design team can enhance your multimedia experience with customized solutions and service to preserve your investment.
