

## **SIGNET Attains ISO 27001 Certification**

**An internationally recognized standard that sets out the requirements for establishing, implementing, maintaining, and continuously improving our clients Information Security Management System (ISMS)**

SIGNET achieves ISO 27001:2013 Certification

Norwell, Massachusetts – March 7, 2023 – SIGNET today announced that it has received ISO 27001:2013 certification for its Information Security Management System (ISMS). As a technology solutions provider, SIGNET is well versed in a wide variety of verticals and technologies, but they especially look forward to leveraging this certification for their Managed Service offering, Remote Smart.

ISO 27001:2013 is an information security standard published by the International Organization for Standardization (ISO), the world's largest developer of voluntary international standards, and the International Electrotechnical Commission (IEC). SIGNET's certification was issued by A-LIGN, an independent and accredited certification body based in the United States on successful completion of a formal audit process. Compliance with this internationally recognized standard confirms that SIGNET's security management program is comprehensive and follows leading practices.

Furthermore, this certification demonstrates SIGNET's continued commitment to information security at every level and ensures you that the security of your data and information has been addressed, implemented, and properly controlled in all areas of our organization.

"Combined with our ISO9001 certification, SIGNET is proud to strengthen our commitment to maintaining the highest levels of information security and quality management standards in support of both our employees and clients," said Andrew Pelletier, Executive Vice President at SIGNET. "These standards reflect our focus on SIGNET's core values to continuously innovate, collaborate and perform with integrity."
